Directors: Andrew Goldberg (andrew@bionicbruins.org), Eric Liang (erichliangos@gmail.com)

Who are we?

We're a team of students from Branham High School's Robotics and Computer Science Clubs continuing our school's annual hackathon tradition. We view hackathons as the best way to connect programmers in our community and an excellent source of learning and fun.

Our Event

This year is the 4th iteration of our annual hackathon. We're a free, 12 hour event open to all students in the CUHSD school district. We provide food, prizes, and coding workshops to all attendees. Last year we had over 90 participants from 5 high schools.

Why Sponsor?

High school students are the programmers of the future. Many students interested in CS are only novices, so companies can have a significant impact on the tools they'll choose to use now and for their future careers. Thus, your sponsorship will have a tangible impact on their CS experience.

What We Need

- **Meals:** Our event is completely free to participants. We want to provide lunch and dinner to participants and need funding to do this!
- **Prizes:** Monetary donations or your company's products can help attract students to participate and improve the overall experience for our participants.
- **Developers:** Experienced developers can help by sharing their career experience and judging the final projects.
- **Workshops:** We'd love to have developers share their knowledge by teaching our participants your product or any relevant technologies.
- **Anything:** We'd love your help in any other way you can offer!

Contact Us

If you have questions about our event or would like to sponsor the event please contact us at andrew@bionicbruins.org or erichliangos@gmail.com

We greatly appreciate all consideration!
